

CLIENT LETTER

To,

Mr. JAGTAP MUKUL RAMESH

PRATIBHA INSTITUTE OF BUISNESS MANAGEMENT CHINCHWAD , PUNE

Dear Mukul ,

I am writing to express my excitement for the proposed web-based application that you are developing for GAGRANI AGENCIES . As a business owner, I am constantly looking for ways to streamline my operations, and I believe that this system will be a game-changer for me.

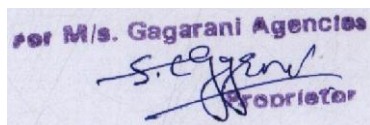

I am impressed with the technologies that you are using for this project, including Spring Boot, Hibernate, MySQL, and Angular Framework. I am confident that these technologies will ensure that my application is robust, scalable, and user-friendly.

I am particularly excited about the real-time inventory tracking and customer management features that this system will offer. These features will enable me to manage my inventory more efficiently and provide better customer service to my clients. I am also pleased to hear that an online payment gateway will be integrated, which will make it easier for my clients to pay for their orders.

I appreciate the fact that you have set a timeline of 45 days for the development of this system, and I am happy to hear that you will be working in weekly sprints to ensure that the project is completed on time. I am also glad to know that you will be seeking my feedback throughout the development process and making changes as necessary.

Overall, I am thrilled about the proposed system and look forward to its completion. I am confident that this system will help me grow my business and provide better services to my clients. Thank you for your dedication to this project and for your commitment to delivering a high-quality system.

Sincerely,

GAGRANI AGENCIES
